DADE. 1674.

A
PROGNOSTICATION

In which you may behold the state of
this year of our Lord God, 1674.

Being the Second after the Bissextile

Having the Disposition of the FOUR
Seasons, the Eclipses, the Oriental and Oc-
cidental Position of the Planets, with the
increase and decrease of the Moon, and
daily inclination of the weather.

Also certain Physical verses, and short
Rules for Husbandry for every moneth
throughout the year.

To which is Added the Magnitudes and
Distances of the Planets, and other
NOTES of good consequence.

By WILLIAM DADE, Gent.

LONDON,
Printed by T. N. for the Company of
Stationers, 1674.

A Brief and necessary Table, for the beginning
and ending of the four Terms,
with their Returns.

Hillary Term begins *January 23.* and ends *February 12.* and hath four Returns.

| | |

A Prognostication.

A Description of the Four Seasons, or Quarters of the Year.

And first of Winter.

Sol in ♍, ♎, ♏.

ACcording to the Astronomical Account, the Winter Quarter took its beginning upon the Eleventh of *December*, 1673. and will continue till the 10th. of *March* this year 1674. So that the first part of the Astronomical Quarter, is in one Politick year, and the latter part thereof in another.

This Season of its own disposition, is known to be cold and moist, contrary to the quality of the Summer; and in this quarter, the inward parts of Man are very hot, and being healthful, may receive plenty of food, because natural heat is now comforted, and is gone inward, and there increased, and maketh digestion the better.

As for the disposition of the Weather in this Quarter, you have it in the daily inclination.

The Sickneses whereunto this Quarter is most inclined are Palsies, Rhumes, Gouts, Pusses, cold Rheums, Melancholy, Coughs, Sore-eyes, Sciaticaes, Pains in the Breast and Lungs, with divers kind of Infirmities incident among Women.

Of the second Quarter of the Year, called
The Spring.

Sol in γ , δ , Π .

THe Spring time (being the Second part of the Astronomical Year) taketh its beginning on Tuesday the 10th of *March*, when the Sun enters into the first day of *Aries*, the Equinoctial point making the dayes and nights of equal length, and continues till Thursday the 11th. of *June*, being St. *Barnabas* day, at which time the Sun enters the Tropical Sign *Cancer*, making the longest day and shortest night.

This season is naturally hot and moist, and is of the Sanguine complexion, being the most temperate and healthful time of the year, yet produceth it many Diseases, not ingendering them by excess, but discovers them which were inwardly bred by the distemperature of other times: yet it is the most fitting Season to dispel Diseases that have been of any long continuance.

How the inclination of the Aire will be, may be seen in the Account of this Season.

The infirmities of this Quarter are Measles, Small-pox, Scabs, Agues, Collick, Melancholies, Madnes, Burning Feavers, and others the like, which proceed from corrupt Blood.

Of

A Prognostication.

Of the third part of the Year, called
Summer.

Sol in ♋, ♌, ♍.

Summer (which is accounted the third Astro-
nomical Quarter of the Year, being natu-
rally hot and dry, and of the Cholerick Complexi-
on beginneth at the time of the Suns entrance into
Cancer, which will be this year upon *St Barnabas*
day, which is Thursday the 11th of *June*, which
is the time of the Summer Solstice, the Sun then
having greatest North-declination from the
Equinoctial, and now are the dayes Longest, and
the Nights shortest, and this Summer Quarter
doth continue till Sunday the 13th of *September*.

Now cannot the Stomach digest such hard
Meats as it may in the Winter season, for the
natural heat is now distributed into the exte-
rior parts, and man is not now so hot within
as in winter.

Concerning the condition and temperature of
the Air this Quarter, you have it in the daily in-
clination.

The Sickneses that do generally abound this
Quarter are hot Feavers, and burning Agues,
Scabs, Pusshes, Jaundies, Vomitings, Sore Mouths
and Throats, with Pains in the Head and Back.

D A D E. 1674.

Of the fourth Quarter of the Year called
Autumn or Harvest.

Sol in \cap , m, \downarrow .

Autumn or Harvest (being the Fourth or last Quarter of the Year) according to Astronomical Computation, being naturally cold and dry, and of the Melancholly Complexion, beginneth upon Sunday the 13th of *September*, when the Sun forsaketh the last degree of *Virgo*, and entereth into the first degree of *Libra*, where he then again worketh the same effect as he did at his entrance into *Aries*, that is, Making the days and nights of equal length, he rising exactly at six in the morning and setting at six at night; and this Quarter doth continue till *Friday* the eleventh of *December*, on which day the Sun enters into the first minute of the Southern Tropical Sign *Capricorn*, making the shortest dayes and longest nights.

Of all the other Quarters this is the most unwholsome, for it is more subject to Sickneses then any of the other; for the dregs of all diseases of the former parts of the year, will now burst out and shew it self.

For the inclination of the Aire in this Quarter, you have that in the daily account thereof.

The Diseases of this Quarter are many and dangerous, as Black Jaundies, Falling-Sickness, Dropsies, Consumptions, Megrims, Boyles, Emroids, Toothach, Spleen, Cramps, Coughs, Melancholly, &c.

Of

A Prognostication.

Of Eclipses this Year 1674.

Five times this Year will the two great Luminaries be Eclipsed, *viz.* Thrice the Sun, and twice the Moon, of which only the two of the Moon will be conspicuous in the Horizon of *London*.

The first will be of the Moon upon the 12 day of *January*. the beginning whereof will be at 42 min. past 3 in the morning; the middle at 22 min. after 5, and the end at 2 min. after 7, so that the whole duration will be three houres and 20 min. and the Moon will be darkned about 11 digits.

The second is of the Sun on the 26th of *January* about 9 at night, and cannot be seen.

The third of the Moon, will be on the 8th of *July*, beginning at three quarters of an hour after 6 at night, the middle will be at 39 min. after 8, and the end at 34 min. after 10. The whole continuance being 3 houres and 49 min. the Moon rising Eclipsed, and the parts of the Moons body darkned will be 12 digits.

The fourth will be of the Sun, upon the 23 of *July*, about 2 of the Clock in the morning, and so cannot be seen of us.

The last Eclipse will be of the Sun also, upon the 17th of *December*, about 5 in the morning, and so cannot be seen of us.

Here

Here followeth certain *Physical Verses*, with a Description how the Planets are placed in the Heavens, either before or after the Sun, whereby you may perceive how they keep their motions, day and night. To which is annexed the New, Full, and Quarters of the Moon, with the daily disposition of the Weather; also short Rules for Husbandry for every Moneth throughout the Year.

Of January.

If thou be sick and help wouldst have,
The counsel of the Learned crave.
If thou hast Health, to keep thee so,
Fly Idleness as a deadly fo.

Saturn will be with the Moon in Conjunction at 10 at night the 4th day.

Jupiter will be in the mid-Heaven at Sun-rising.

Mars is Oriental, and may be seen before the Sun riseth.

Venus will be with the Moon at midnight the 25 day.

Mercury will be at his greatest distance from the Sun about the end of the Moneth.

The 1, 2, 3 and 4 days Cold and Frosty.

First Quarter the 5th day, a quarter past 4 in the morning.

The 6 7 and 8 Snow and Wind.

The 9, 10, and 11 the weather changes.

Full Moon the 12 day, 22 min after 5 in the morning, the Moon rising Eclipsed.

The

A Prognostication

The 13, 14 and 15 Fair weather.

The 16 and 17 Northerly Windes.

Last Quarter the 18 day, 9 min. after 9 at night.

The 19, 20, 21 and 22 Variable.

The 23, 24 and 25, Snow and Whirlwindes.

New Moon the 26 day, 41 min. past 8 at night.

The 27, 28 and 29, Remifs and Cold.

The 30 and 31 Cold Northerly Windes.

Januaries Instructions for Husbandry.

This Moneth set all kinde of Fruit-trees, and Quicksets: In the New of the Moon (the wind and weather observed) you may set Pease and Beans, Parsnips, and Oats, if the weather prove milde, and the Moon decreasing.

Of February.

Be choice of Food in any wise,

To keep thee warme also precise:

Beware likewise thou let not blood,

Except the Learned think it good.

Saturn will be with the Moon the first day of the Moneth.

Jupiter is Stationary, and will begin to be Retrograde the 22 day.

Mars will be in a Square to *Saturn* upon the 11th day.

Venus and *Mercury* will be in Conjunction the 25 day,

The 1 and 2 dayes, Snow.

First Quarter the third day, 51 min. past 10 at night.

The

D A D E. 1674.

The 4, 5 and 6 Southerly Winde,

The 7, 8 and 9 Cold Rain.

Full Moon the 10 day, a quarter past 3 afternoon.

The 11, 12 and 13 more warm, and

The 14, 15 and 16 Faire Weather.

Last Quarter the 17 day within a quarter of an hour of high noon.

The 18, 19 and 20 Variable.

The 21, 22, 23, and 24 Westerly Wind and fair.

New Moon the 25 day, a quarter past 3 in the afternoon.

The 26, 27 and 28 Pleasant dry weather.

Februaries Instructions.

This Moneth set Roses, with all other kind of Plants, and Quicksets, sow Pease and Onions; as in the Moneth before (the weather considered) you may now garden for Sallet-herbs, Pot-herbs and such like.

Of March.

Now Bleed and Bathe if thou desire,

And Purge also if need require.

Ill humours do in many breed,

Provide in time before you need.

S *Atturn* riseth with the Sun towards the end of the Moneth.

Jupiter will be seen with the Moon the 15 day.

Mars is Oriental to be seen before the Sun rises.

Venus

A Prognostication.

Jupiter will be in Conjunction with *Saturn* at 7 at night the 18th day.

Mercury will be in Conjunction with *Saturn* at midnight the 18th day.

The 1, 2, 3 and 4 fair and good weather.

First Quarter the 5 day, 44 min. past 10 in the Morning.

The 6, 7 and 8 Northerly Winds.

The 9, 10 and 11 settled weather.

Full Moon the 12 day, a Quarter before 1 in the Morning.

The 13, 14 and 15 Winde.

The 16, 17 and 18 Raine.

Last Quarter the 19 day, 12 min. after 4 in the Morning.

The 20, 21 and 22 Rain, and

The 23, 24, 25 and 26 Party-colour'd Clouds.

New Moon the 27 day, 52 min. after 6 in the morning

The 28, 29, 30 and 31 Thunder or great Wind.

Marches Instructions.

This Moneth (in the New of the Moon) graft, set Quicksets and Vines, cut your Hedges and Vines already growing: Also you may sow Onions, Beans, and Oats, and all manner of Garden-seed.

of

DADE 1674:

Of April.

*Now wholesome Baths thou mayst frequent,
Let blood also, and not repent :
These are good means thee to defend,
From Griefs, the which on thee attend.*

S *Aturn and Venus Rise together the first day of
the Moneth.*

Jupiter rises when the Sun sets.

Mars will be with the Moon the 20th day.

Mercury is under the Sun-beams at the 22th day.

The 1 and 2 dayes coole Rain.

First Quarter the 3 day, 19 min. past 7. at night.

The 4, 5 and 6 Faire, and

The 7, 8, and 9 pleasant weather.

*Full Moon the 10 day, a quarter past 10 in the
forenoon.*

The 11, 12 and 13 Windy, but

The 14, 15 and 16 Faire.

Last Quarter the 17 day, 25 min. past 9 at night.

The 18, 19 and 20 Rain.

The 21, 22, 23 and 24 Variable.

New Moon the 25 day, at 9 at night.

The 26, 27 and 28 uncertain weather.

The 29 and 30 to the Moneths end.

April

A Prognostication.

April's Instructions.

In this month Pole your Hops, sowe Barley
and Artichoacks, Bark Trees for *Tanners*, sowe
Lamp and Flax, set Citrons, Melons, and Cucum-
bers and furnish and replenish your Gardens
with Summer-herbs.

Of May.

*Rise early now this Moneth of May,
And walk the Fields that be so gay:
From Surfetting see thou refrain,
Or soon it will procure thy pain.*

Atturn sets when the Moon Rises.

*Jupiter will be with the Moon upon the 3
day.*

Mars and Venus are in Square to each other.

*Mercury is Stationary, and about the 10 day be-
gins his direct Motion.*

The 1 and 2 dayes Fair.

*First Quarter the 3 day, a quarter before 1 in
the Morning.*

The 4, 5 and 6 pleasant weather.

The 7 and 8 still fair and pleasant.

The 10, 11 and 12 Good, and

The 13, 14, 15 and 16 seasonable weather.

*Last Quarter the 17 day 54 min. past 2 in the af-
ternoon.*

The

D A D E. 1674.

The 18, 19, and 20 Heat, with

The 21, 22, 23 and 24 Thunder.

New Moon the 25 day, at 9 in the Morning.

The 26, 27 and 28 Variable,

The 29, 30 and 31 Cooling showers.

May's Instructions.

In the beginning of this Moneth you may sow the Seeds of Summer-Herbs, which could not endure the cold of the forepassed Moneths. You may yet sow Hemp and Flax; Weed your Hop-Gardens, and take away superfluous Branches, and Moss your Gardens.

Of June.

Drinks new or sweet taste not at all,

For thereby grows no danger small:

And to thyself such past-time take,

As may in God thee merry make.

Saturn sets When the Moon rises on the 4. day.

Jupiter is with the Moon the 4 day.

Mars & Venus are in Quartile Aspect the 28 day

Mercury is under the Sun-beams.

First Quarter the 1 day, 39 min. past 4 in the morning.

The 8, 9 and 10 Rain,

The 11, 12, 13 and 14 are Haile.

Last

DADE, 1674.

Last Quarter the 15 day, half an houre past 11 at night.

The 16, 17 and 18 dry, but cloudy,

The 19, 20, 21 and 22 heat and thunder.

New Moon the 23 day, 22 min. past 2 in the morn.

The 24, 25 and 26 Variable, and

The 27 and 28 uncertain weather,

First Quarter the 29th day, 24 min. past 4 in the afternoon.

The 30 and 31 more settled Aire.

July's Instructions.

In this Moneth ply your Haying, fallow your Lands for Wheat; pull up Hemp that is ripe; get Rue and Wormwood to drive away Fleas, and Moths. Dry Flowers in the shade, and then Sun them a little for fear of corruption.

Of August.

As burning heat will wee destroy,

So shivering cold will thee annoy.

Let little sleep thee now content,

Purge not, nor bleed, lest thou repent.

Saturn is now Stationary, and begins to be Retrograde.

Jupiter will rise when the Moon sets the 12 day,

Mars will be with the Moon the 13 day,

Venus may be seen after Sun-setting,

Mercury is under the Sun-beams at the end of the Moneth.

The

A Prognostication.

The 1 and 2 fair and dry,

The 3, 4 and 5 showery.

Full Moon the 6 day, 12 min. past 11 before noon.

The 7, 8, 9 and 10 variable.

The 11, 12 and 13 Hot weather.

Last Quarter the 14 day, at 2 in the Afternoon.

The 14, 15 and 16 flying Clouds.

The 17, 18, 19 and 20 bringing Rain.

New Moon the 21 day, at 10 in the forenoon.

The 22, 23 and 24 Haile, and

The 25, 26 and 27 Thunder.

First Quarter 28 day, 3 quarters past 2 in the morn.

The 29, 30 and 31 Serene Aire.

August's Instructions.

Reap Wheat and Rye, cut down your Oats, gather Garden-Seeds, sowe Lettice and other Winter herbs in the New of the Moon. Use moderate diet, forbear to sleep presently after Meat, take heed of sudden cold after great heat.

Of September.

Raw fruit, though ripe, may sickness bring;

Unripe much eat, a dangerous thing.

If now a Scurfeit thou dost take,

When others sleep thou must awake.

Saturn will be with the Moon the 9 day.

Jupiter and Venus will be together the 20th day at 10 at night,

Mars will oppose Venus the last day.

B

Mercury

D A D E. 1674.

A

A Description of the Magnitudes, Motions and Distances of the Seven Planets

A *Rgol*, a laborious and Learned *Astronomer*, giveth this account of the Planets Motions and Distances, to wit,

| | |
|--------------------------------|--|
| The <i>Sun</i> is greater then | <p><i>Saturn</i>, Nine times.</p> <p><i>Jupiter</i>, Fourteen times.</p> <p><i>Mars</i>, Two thousand five hundred thirty five times</p> <p><i>Venus</i>, Twelve hundred and seventy times.</p> <p><i>Mercury</i>, Three thousand seven hundred and five times.</p> <p>The <i>Moon</i>, Ten thousand times.</p> <p>The <i>Earth</i>, One hundred ninety six times.</p> |
| <i>Saturn</i> is greater then | <p><i>Jupiter</i>, The one half.</p> <p><i>Mars</i>, Two times.</p> <p><i>Venus</i>, Two hundred eighty six times</p> <p><i>Mercury</i>, Four hundred and eighteen times.</p> <p>The <i>Moon</i>, One thousand one hundred twenty two times</p> <p>The <i>Earth</i>, Twelve times.</p> <p><i>Mars</i>, One hundred eighty two times</p> <p><i>Venus</i>, Eighty four times.</p> <p><i>Mercury</i>, Two hundred sixty six times</p> <p>The <i>Moon</i>, Seven hundred and fourteen times</p> <p>The <i>Earth</i>, Fourteen times.</p> |
| <i>Jupiter</i> is greater then | |

Venus

Venus is twice as big as *Mars*, and Three times as big as *Mercury*.

Mars contains *Mercury* once and a halfe.

The *Moon* } *Mars* Thirteen times.
is greater then } *Venus*, Six times.
 } *Mercury*, Nineteen times.

| | | |
|------------------|---|-----------|
| The <i>Earth</i> | } is distant from the <i>Firmament</i> | 49150720 |
| <i>Saturn</i> | | 127804480 |
| <i>Jupiter</i> | | 35425120 |
| <i>Mars</i> | | 47490640 |
| The <i>Sun</i> | | 44710000 |
| The <i>Moon</i> | | 4898080 |

Saturn is distant from { *Jupiter* --- 23138540 Miles.
 } *Mars* --- 29361440 Miles.
 } The *Sun* - 3193352 Miles.
 } The *Moon* 36171600 Miles.

Jupiter is distant from { *Mars* --- 7722800 } Miles.
 } The *Sun* - 9294880 }
 } The *Moon* 1353260 }

Mars is distant from { The *Sun* - 157080 } Miles.
 } The *Moon* - 6310160 }

The *Sun* is distant from the *Moon* 4238080, that is, Four Millions, Two hundred thirty eight thousand, and eighty Miles.

Hac incredibilia videntur tantum iis, qui Mathematicis demonstrationibus non assueverant, &c.
